SUMMARY

Seeking a Front-End Developer role, where I can further develop my technical skills and gain technical experience. I am a Web Developer who focuses on creating user interfaces with hands-on experience from The Knowledge House Innovation Fellowship, with a background in operations. Worked on projects focused on designing and developing responsive front-end interfaces using technologies like Node.js, HTML, and CSS, and collaborating on a team to deliver a full-stack application.

SKILLS

Technical Skills: JavaScript, Node.js, Express, HTML5, CSS3, Git
Development Tools: VS Code, GitHub, Figma, Chrome DevTools
Others: Passion for writing and drawing, strong collaboration skills, communication skills

EXPERIENCE

City of Newark • Newark, NJ   **July 2019 - Present**
Office services, Summer Youth Employment Program

- Operated a printing machine in order to print flyers and office materials
- Performed file maintenance
- Collaborated with 4+ other staff members in the mailroom in order to increase work efficiency
- Demonstrated organization skills by assisting with the organization of boxed materials prior to delivery

Internship w/ Assemblywoman Cleopatra Tucker • Newark, NJ   ***July 2017 - August 2018***
Intern, Summer Youth Employment Program

- Assisted in the Assemblywoman's office by helping with phone calls during the day when she wasn't available
- Demonstrated my experience with computers by assisting in answering and sending out 4+ emails weekly on behalf of the Assemblywoman
- Performed file maintenance
- Networked with various visitors in the office

PROJECTS

PokeInput DB Webpage | [project link](#) | [github repo](#)   ***May 2025***

An interactive Pokémon information web application built with Node.js, HTML, CSS, JavaScript, and Vite that demonstrates API integration and responsive design. Created to allow users to access simple Pokémon data such as images, names, cries, and more.

- *Developed a responsive front-end interface using modern CSS grid and flexbox techniques*
- *Used RESTful API called PokeAPI with endpoints such as a Pokémon's id, allowing access to 1025 different Pokémon's stats and data*
- *Created an interactive button using DOM manipulation and event listeners to enhance the user experience*
- *Utilized GitHub for the repository and Netlify for deployment*

Dolittle - TKH & Bloomberg Hackathon | [Team Activity Log](#)   ***June 2025***

Collaborative pet care management application developed during the 96-hour TKH & Bloomberg Hackathon by a team of 6 developers. Designed to help pet owners organize and track care schedules for multiple pets.

- *Designed a Data Model using [app.diagrams.net](#), creating a visual Entity Relationship Diagram, thus demonstrating the ability to determine relationships between entities in data tables*

EDUCATION

The Knowledge House, Bronx, NY   **Expected Graduation December 2025**
Innovation Fellowship - Web Development Track

- *Completed 400+ hours of intensive technical training in full-stack web development*
- *Developed 3 web applications using JavaScript and Node.js*
- *Participated in 30+ exercises involving various skills and tools such as VSCode, Git, Vite, and Node.js*

New Jersey Institute of Technology, Newark, NJ   **September 2020 - June 2021**
Degree: N/A, Major: Computer Science

EXTRACURRICULAR ACTIVITIES

Westside Park Elementary School , Newark, NJ   **May 2017 - May 2019**
Mentor
- *Read to elementary school classes and worked with students one-on-one to help them with reading skills*
- *Assisted in classroom set-up and preparation of materials for group activities*
- *Socialized and shared my experience with younger students*
